REVO

What is the REVO system

REVO optical groups utilise the unprecedented combination of PMMA lenses with their very high transparency designed to deliver beam widths from 6 to 52 degrees through a specific crossed beam alignment that not only recovers and cancels the dispersions of the 'field angle' and it's particular inhibitors of annular luminance without any decrease in performance.

The emission of the very high quality LED source is therefore optimised and directed with precision, bringing really relevant Lux values to the subject.

OPTICS

The large availability of symmetrical and asymmetrical beam options and the large choice of accessories provided make the REVO system complete and perfectly suited to projects where photometric value becomes decisive.

What are Homogenic Lenses?

We have called our asymmetric optical systems “homogenics” for a very specific reason:

The excellent optical characteristics of the new asymmetrical lenses are expressed by the focused delivery of lux on the plane and by the fluid and homogeneous light distributions they produce. These aspects allow us to obtain a comparison-proof dimension-performance ratio and therefore allows us to achieve visual miniaturization of the lighting bodies and a reduction in power.

Uniformity: Uniformity up to 80% and complementary photometries to perfectly adhere to different needs.

Comfort: Visual comfort guaranteed by adjustable anti-glare rings

Rendering: Colour rendering, consistent with the REVO system. The Homogenics versions are realised with just a 2-step Macadam Ellipse LED selection and two types of CRI: 92 and 98.

The Homogenics versions also boast 2DCM LEDs in selection and two types of CRI: 92 and 98.

Our new wall washer units are created with three types of delivery characteristics:
GRAZING WASHER, AREA WASHER, DEEP WASHER.

GRAZING WASHER (GWW)

GRAZING Washer for distributed grazing effects which enhances the materials and textures of the walls.

POSITIONING LUMINAIRE			
(h) Height	(a) Distance from the wall	(b) Spacings	 90°
h	a= 0,3 x h	b= a	
Lighting check GWW Medium			Uniformity
3	0,9	0,9	0,73

AREA WASHER (AWW)

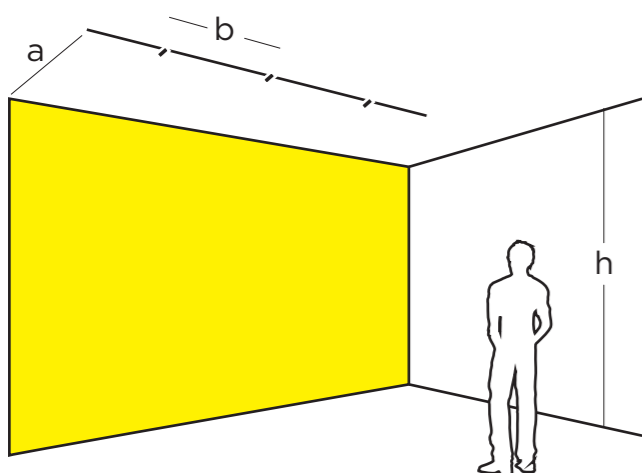

AREA Washer fluid accentuation of the horizontal mid-range, typical of the wall display of pictorial and photographic works, and hanging planar elements.

POSITIONING LUMINAIRE			
(h) Height	(a) Distance from the wall	(b) Spacings	 90°
h	a= 0,3 x h	b= 1,3 x a	
Lighting check AWW Medium			Uniformity
3	0,9	1,2	0,72

DEEP WASHER (DWW)

DEEP washer Typical of wall displays with strong distribution, widely used in the presence of shelves, display cases and three-dimensional elements.

POSITIONING LUMINAIRE			
(h) Height	(a) Distance from the wall	(b) Spacings	 40°
h	a= 0,5 x h	b= 0,8 x a	
Lighting check DWW Medium			Uniformity
3	1,5	1,2	0,64

Medium precision shaper

The new REVO range includes among its numerous optical solutions the shaper with movable fins in the Medium version. Available in track, base and semi-recessed versions.

The system is built to have a precise focus, a smooth rotation and the sliding of the blades on magnets for a defined and stable framing.

The single movable lens allows excellent performance and high framing precision.

Declined in the power of 17,9 w it can be used in many contexts where the optical quality is never secondary to the dimensional and visual appearance.

Application example PLACES OF WORSHIP

Museo Revo minimum presence.

There is only one way to enter a Byzantine Basilica, in silence.

The Museo Revo series is conceived and designed exclusively for this purpose. Hiding out of sight is its primary mission.

Minimum size means achieving consistent performance under total control. The power of the Revo optical system allows us to emphasize the whole narrative of the monument with minimal mimetic points of light.

To illuminate the central nave were used:
 - REVO MUSEUM Medium / Flood optic
 positioned on the capitals at a height of 6 meters.

To illuminate the side aisles were used:
 - MUSEUM REVO Compact / Narrow Flood optic
 positioned on the beams at a height of 9 meters.

To illuminate the front mosaic were used:
 - MUSEUM REVO Compact / Very Narrow Spot optic
 - MUSEUM REVO Compact / Narrow Flood optic
 - REVO MUSEUM Compact / Flood optic
 positioned on the capitals at a height of 6 meters.

To illuminate the side altars were used:
 - REVO MUSEUM Compact / Spot optic
 positioned on the beams at a height of 9 meters.

Application example OFFICE

PIN REVO total comfort

The basic concept of the Pin Revo collection is very close to that of a sugar-free coffee. Pure light, photometry in its clearest synthesis.

In this project, for example, it is used to accentuate a path and to illuminate workstations, and for the homogeneous diffusion of a common space. Opposing requirements but equally fulfilled solutions with high efficiency 'dark' optics.

To illuminate the paths were used:
 - PIN REVO Mini Square 2x / Narrow Flood optic positioned recessed in the ceiling.

To illuminate the offices, the following were used:
 - PIN REVO Small Square / Flood optic
 - PIN REVO Small Square / Narrow Flood optic positioned recessed in the false ceiling.

To illuminate the waiting area, the following were used:
 - PIN REVO Small Square / Flood optic positioned recessed in the false ceiling.

Application example HOSPITALITY

Spot Revo Semi-recessed fixed points with flexibility.

In this project the luminaire carries out differentiated and complementary tasks with a simple and minimal graphic solution. A recessed model that enables the freedoms of an adjustable solution with fluidity of orientation and a wide variety of optical configuration. Elliptical lenses, wallwashers and a beam shaper make it a graphic tool capable of dealing with complex and varied project requirements.

To illuminate the tables were used:
- SPOT REVO Semi-recessed Small / Narrow Spot
positioned recessed in the false ceiling.

To illuminate the counter were used:
- SPOT REVO Semi-recessed Small / Narrow elliptical
positioned recessed in the false ceiling.

Application example RETAIL

Spot Revo 230v.

The combination of the Revo optical system with the flexibility of the 230v track generates great freedom of expression, which in this project is revealed in the interaction of asymmetrical Wallwasher, roto-symmetrical and elliptical optics, all united by low luminances.

In this simulation, the Revo semi-recessed and Spot track systems with twin characteristics are used to obtain homogeneous effects and complementary lighting.

To illuminate the tasting area, the following were used:
- SPOT REVO Medium / Wide Flood optic
- SPOT REVO Medium / Wide Flood Elliptical optic
positioned on a ceiling-mounted track at a height of 3.9 meters.

To illuminate the exhibition area, the following were used:
- SPOT REVO Medium semi-recessed / Grazing Washer optic
positioned recessed at 3.4 meters in height.

MUSEUM

The world of museum and exhibition design can make use of two types of systems with Revo optics. The traditional three-phase 230V track with its versatility and range of possible versions and extensions, and the new 48v which, in terms of size, graphics, and construction elements, offers an elegant and effective minimal solution.

In this case, the Small projector that was included in the project has twice the available characteristics in both possible luminaire systems.

To illuminate the works of art, the following were used:

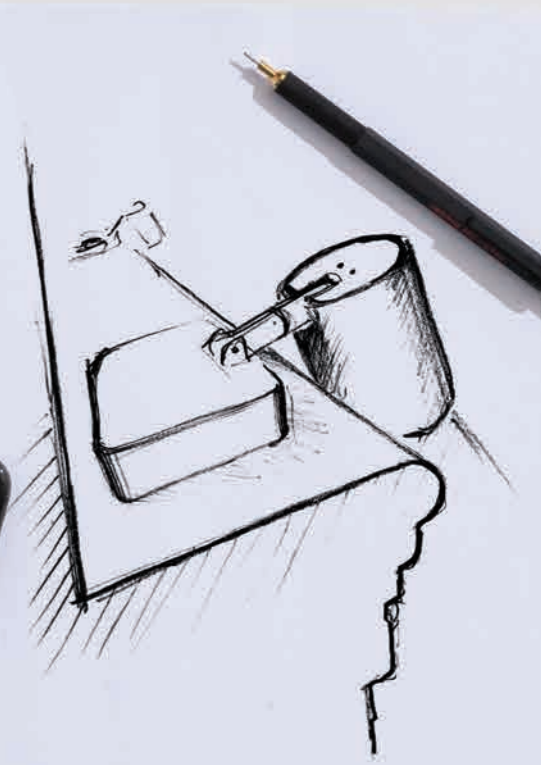

- SPOT REVO Small / Spot optic
 - SPOT REVO Small / Narrow Spot optic
- positioned on a ceiling-mounted track at a height of 3 meters

MUSEO REVO

Family of projectors for surface installations with drivers integrated in the support and fixing base. Suitable for lighting with very high visual comfort, direct and indirect, they are particularly suitable for use on cornices and overhangs.

Dedicated to an advanced lighting design, the new Revo-Dark optical systems are particularly suitable for environments with very high visual comfort.

MUSEO REVO

Characterized by double joint and six degrees of freedom, they allow precise and accurate positioning in every direction.

The dimensions reduced to a minimum, the finishes are dedicated to discreetly conceal the luminaire within the architectural fabric of the project. Both combined with the new REVO performance parameters, reaching an unbeatable size-performance ratio.

The powder-coated aluminum structure offers different finishes and 5 different sizes complemented by a wide range of optical accessories and one shaper.

Design, built and produced in Italy.

Location: Basilica di San Miniato al Monte, Florence
Project: Cappella del Cardinale del Portogallo restoration by Friends of Florence

The Mini version offers beams from 8° to 34° with numerous compendium accessories.

High color rendering, medium UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

The full compatibility with the most common control systems make Museo Revo Mini the perfect tool in contexts where the value of the source is determined by a very high performance quality and by the minimum physical and visual intrusiveness.

The multi-optic version allows the use of differentiated beams on the same luminaire in the operating variants Spot, Narrow Flood, Flood.

The multi-optic versions configured with unified beams are available in all variants of optics.

MUSEO REVO Medium accessories

Primary ring

Code

Primary ring that enables the housing of any accessory to be fixed on the front of the standard ring.
A primary ring is always necessary for fixing one or more overlapping accessories.

9G085

Elliptical lens

Code

Rotatable lens to allow the elliptical deformation of the beam amplitude and variable illuminated characteristics, co-dependant on the chosen optical combination.
 Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

9G082

Diffuser lens

Code

Specific lens to obtain a more diffused projection.
 Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

9G083

Visor

Code

Partial rotatable visor, to assist with the shielding of any directional glare.
 Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

9G079

Snoot

Code

Omnidirectional glare reducer, to assist in shielding any radial glare disturbances.
 Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

9G080

Honeycomb louvre

Code

Honeycomb glare lens gives further protection from radial glare disturbances.
 Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

9G084

Protective Glass

Code

Additional shielding useful to prevent the accumulation of dust and residues in the optical compartment when the luminaire is used for indirect applications.

9G081

MUSEO REVO Compact

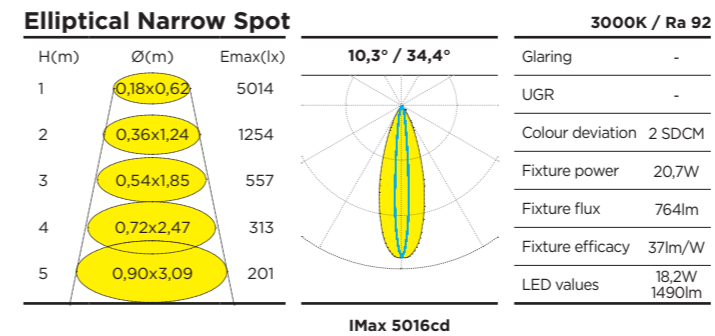

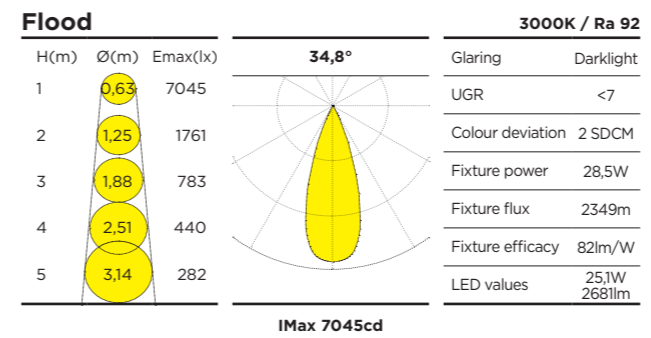

The Compact version offers beam widths from 6° to 50° two elliptical beams EN and EW and the refined asymmetrical wall-washer DWW with high homogeneity.

The numerous accessories in the range are designed with a fastening system with overlapping elements allowing a differentiated and specific optical configuration.

High color rendering, UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

The overall aluminum body uses new frictioned brass arms, equipped with micrometric locking for easy and definitive aiming.

The full compatibility with the most common control systems make Museo Revo Compact the perfect tool in contexts where the value of the source is determined by a very high performance quality and by the minimum physical and visual intrusiveness.

SPOT REVO 230V

Family of projectors for 230V track installation with driver integrated into the adapter, available in four sizes eight roto-symmetrical optical variants per model, three additional asymmetrical models for Medium, Compact, Max models, plus a shaper on the Medium version.

Dedicated to an advanced lighting design, the new Revo-Dark optical systems are particularly suitable for environments with very high visual comfort.

Equipped with rotosymmetrical "cross" and asymmetrical high efficiency optics, they are particularly suitable for museum use and projects with complex lighting requirements.

SPOT REVO 230V

The Spot Revo series boasts a marked performance-size ratio, a rich possibility of accessory integrations and a wide range of finishes, but above all it stands out for its precision, cleanliness and uniformity of projection.

The powder-coated aluminum structure offers different finishes and four different sizes. Design built and produced in Italy.

SPOT REVO Small

The Small version offers five symmetrical beam options from 11° to 47°, two elliptical versions EN and EW and numerous accessories within the range.

High color rendering, medium UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

The full compatibility with the most common control systems make Spot Revo Small the perfect tool in contexts where the value of the source is determined by a very high performance quality and by the minimum physical and visual intrusiveness.

SPOT REVO Small accessories

Visor

Code

9G 073

Snap-on accessory for the partial and directional reduction of glare. Can rotate of 360°. Replaces the ring supplied as standard.

Snoot

Code

9G 074

Cylindrical accessory for the omnidirectional reduction of glare. Snap-on installation. Replaces the ring supplied as standard.

Elliptical lens

Code

9G 075

Elliptical secondary lens. This holographic film is installed onto the primary optic to transform the beam into an elliptical beam. Various ellipses can be obtained depending on the chosen combinations. The lens can be rotated. Replaces the ring supplied as standard.

Honeycomb louvre

Code

9G 076

Antiglare honeycomb lens. It can be installed on the rear side of the standard projector ring

SPOT REVO Medium 230V

The Medium version offers sei symmetrical beam options from 8° to 51°, three asymmetrical wall-washer: Grazing, Area, Deep, two elliptical versions EN and EW and a shaper.

The numerous accessories in the range are designed with a fastening system with overlapping elements allowing a differentiated and specific optical configuration.

High color rendering, medium UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

Full compatibility with the most common control systems make Spot Revo Medium the perfect tool in contexts where the value of the source is determined by a very high performance quality and by minimal physical and visual intrusiveness.

This model is also configurable in the shaper version with movable lenses, to obtain focused quadrangular projections with a light and small-sized instrument.

SPOT REVO Mini semi-recessed

The Mini version offers beams from 8° to 34° an elliptical EN with numerous accessories for the range. High colour rendering, medium UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

The multi-optic version allows the use of differentiated beams on the same luminaire in the opening variants SP, NF, FL.

The multi-optic versions configured with unified beams are available in all variants apertures.

The full compatibility with the most common control systems make Spot Revo Mini the perfect tool in contexts where the value of the source is determined by a very high performance quality and by the minimum physical and visual intrusiveness.

SPOT REVO Mini semi-recessed accessories

Visor

Code
9G 069

Snap-on accessory for the partial and directional reduction of glare. Can rotate of 360°. Replaces the ring supplied as standard.

Snoot

Code
9G 070

Cylindrical accessory for the omnidirectional reduction of glare. Snap-on installation. Replaces the ring supplied as standard.

Elliptical lens

Code
9G 071

Elliptical secondary lens. This holographic film is installed onto the primary optic to transform the beam into an elliptical beam. Various ellipses can be obtained depending on the chosen combinations. The lens can be rotated. Replaces the ring supplied as standard.

Honeycomb louvre

Code
9G 072

Antiglare honeycomb lens. It can be installed on the rear side of the standard projector ring

SPOT REVO Small semi-recessed

The Small version offers six symmetrical beam options from 7° to 47°, two elliptical versions EN and EW and numerous compendium accessories.

High colour rendering, medium UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

The full compatibility with the most common control systems make Spot Revo Small the perfect tool in contexts where the value of the source is determined by a very high performance quality and by the minimum physical and visual intrusiveness.

The multi-optic version allows the use of differentiated beams on the same luminaire in the opening variants SP, NF, FL, WF.

The multi-optic versions configured with unified beams are available in all variants of apertures.

SPOT REVO Small semi-recessed accessories

Visor

Code

9G 073

Snap-on accessory for the partial and directional reduction of glare. Can rotate of 360°. Replaces the ring supplied as standard.

Snoot

Code

9G 074

Cylindrical accessory for the omnidirectional reduction of glare. Snap-on installation. Replaces the ring supplied as standard.

Elliptical lens

Code

9G 075

Elliptical secondary lens. This holographic film is installed onto the primary optic to transform the beam into an elliptical beam. Various ellipses can be obtained depending on the chosen combinations. The lens can be rotated. Replaces the ring supplied as standard.

Honeycomb louvre

Code

9G 076

Antiglare honeycomb lens. It can be installed on the rear side of the standard projector ring

SPOT REVO Medium semi-recessed

The Medium version offers 6 symmetrical beam options from 8° to 50°, three asymmetrical wall-washer: Grazing, Area, Deep, two elliptical versions EN and EW and a shaper.

The numerous accessories in the range are designed with a fastening system with overlapping elements allowing a differentiated and specific optical configuration.

High colour rendering, UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

The full compatibility with the most common control systems make Museo Revo Medium the perfect tool in contexts where the value of the source is determined by a very high performance quality and by the minimum physical and visual intrusiveness.

SPOT REVO Compact semi-recessed

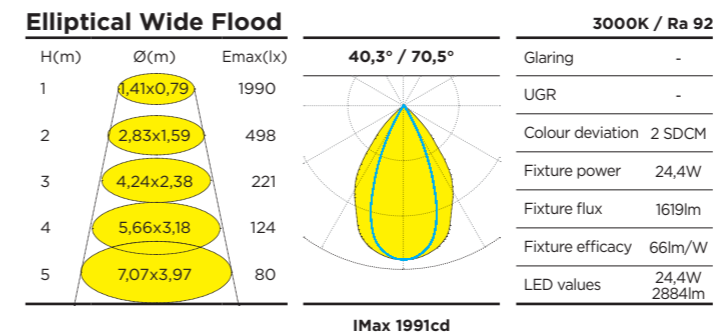

The Compact version offers six beam options from 6° to 50°, three asymmetrical wall-washer: Grazing, Area, Deep and two elliptical versions EN and EW.

The numerous accessories in the range are designed with a fastening system with overlapping elements allowing a differentiated and specific optical configuration.

High colour rendering, medium UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

The full compatibility with the most common control systems make Spot Revo Compact the perfect tool in contexts where the value of the source is determined by a very high performance quality and by the minimum physical and visual intrusiveness.

SPOT REVO Compact semi-recessed accessories

Primary ring

Code
9G092

Primary ring that enables the housing of any accessory to be fixed on the front of the standard ring.
A primary ring is always necessary for fixing one or more overlapping accessories.

Visor

Code
9G086

Partial rotatable visor, to assist with the shielding of any directional glare.
 Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

Elliptical lens

Code
9G089

Rotatable lens to allow the elliptical deformation of the beam amplitude and variable illuminated characteristics, co-dependant on the chosen optical combination.
 Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

Snoot

Code
9G087

Omnidirectional glare reducer, to assist in shielding any radial glare disturbances.
 Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

Diffuser lens

Code
9G090

Specific lens to obtain a more diffused projection.
 Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

Honeycomb louvre

Code
9G091

Honeycomb glare lens gives further protection from radial glare disturbances.
 Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

Protective Glass

Code
9G088

Additional shielding useful to prevent the accumulation of dust and residues in the optical compartment when the luminaire is used for indirect applications.

PIN REVO

Recessed downlighters with IP54 protection covering the optical compartment, designed to obtain maximum performance in the smallest size, available in fixed, single and multiple square and round versions.

Dedicated to an advanced lighting design, the new Revo optical systems are particularly suitable for environments with very high visual comfort.

Available in three optical dimensions, four roto-symmetrical variants per model, all responding to UGR factors <13.

Pin Revo in all its versions acquires an additional degree of high visual comfort if configured with a black finish.

Equipped with "cross" roto-symmetrical optics, the luminaires are particularly suitable for use in projects where low luminances and photometric capabilities become crucial.

The Pin Revo series boasts a marked performance-size ratio, a minimal design, a wide range of colour combinations but above all it stands out for its precision, cleanliness and uniformity of projection.

The powder-coated aluminum structure offers different finishes, the square and round versions are available in single and multiple Mini and Small models.

The square and multi-optical versions are configured pre-assembled in 3D printed frames, available in black or white.

PIN REVO Mini

The Pin Revo Mini version with a diameter of 50mm is available in 18°, 24°, 35°, 48° beams with medium UGR <13 coefficients. Detailing a high colour rendering of CRI 92 & 97, with LED source quality within 2 SDCM.

The cleanliness of the projection and the refined photometric appearance make this family of luminaires the ideal combination between professional performance and graphic minimalism.

Full compatibility with the most popular control systems make Pin Revo Mini the perfect tool in contexts where lighting management and scenography are crucial to the project specification.

All the square versions are configured with 3D frame in white or black.

Versions configured with black finish are defined as **'High Comfort'** as they fully respect the Dark lighting parameters and UGR values <10.

Multi-optic versions are configured with an 3D frame in white or black.

The multi-optical versions allow you to use different beams on the same luminaire.

PIN REVO Small

The Pin Revo small version with a diameter of 70mm is available in 7°, 24°, 36°, 55° beams with medium UGR <13 coefficients. Detailing a high colour rendering of CRI 92 & 97, with LED source quality within 2 SDCM.

The cleanliness of the projection and the refined photometric appearance make this family of luminaires the ideal combination between professional performance and graphic minimalism.

Full compatibility with the most popular control systems make Pin Revo Mini the perfect tool in contexts where lighting management and scenography are crucial to the project specification.

All the square versions are configured with 3D frame in white or black.

Versions configured with black finish are defined as **'High Comfort'** as they fully respect the Dark lighting parameters and UGR values <10.

Multi-optic versions are configured with an 3D frame in white or black.

The multi-optical versions allow you to use different beams on the same luminaire.
